

Unique, Intuitive, Yet Simple doctors companion

We have developed an unique, intuitive, visually driven modular WebEMR (Web based Electronic Medical Record) system by closely working with specialty doctors. We know there are many EMR systems on the market and most of them either provide generalized features or they are cumbersome to operate.

We want to partner with you and innovate further based on your specific use cases and requirements. The OsteosConnect strives in supporting you 24/7 and all week days to make you more productive and achieve maximum revenue.

Our OsteosConnect WebEMR is designed keeping in mind that the doctors and clinical staff can focus on patients and pay attention to their diagnosis and treatment plans rather than typing and documenting all the time. With our OsteosConnect WebEMR, the doctors can save time in documenting clinical activities during patient visits and provides support for both clinical visits and online consultations. Our WebEMR is easily customizable, providing the flexibility of incorporating new features specific to any healthcare specializations.

We have bundled our OsteosConnect WebEMR platform with key features such as visually driven investigations, X-RAY viewer, ICD code based diagnosis, simple clinical OPD workflows including the support for e-prescriptions and pharmacy management. We usually adopt a policy of being a long term digital technology partner and work with you closely in fulfilling your specific customizations to our OsteosConnect WebEMR. Our OsteosConnect WebEMR can be accessed on any device whether it's laptop or desktop or Android tab or it's a iPad and we have designed it to be operating on BYOD (Bring Your Own Device) concept.

OsteosConnect Virtual WebEMR

Preview of web EMR

Register Page

A screenshot of the "Doctor Registration" page. It features a white background with a blue header. The form includes fields for "First Name", "Last Name", "Specialty", "Email", "Phone Number", and "Address". There are also checkboxes for "I am a Doctor" and "I am a Nurse". A "Register" button is at the bottom right.

Login Page

A screenshot of the "Doctor Login" page. It features a white background with a blue header. The form includes fields for "Email" and "Password". There are "Login" and "Forgot Password" buttons. The background image shows a doctor's hands holding a tablet.

Doctor Dashboard

A screenshot of the "Doctor Dashboard" for Dr. Mahantesh Magadum. It features a white background with a blue header. The dashboard includes four main sections: "My Clinics", "Patients", "Clinic Appointments", and "Online Appointments". Each section has a blue header and a white body with orange buttons. The background image shows a doctor's hands holding a tablet.

View Clinics Screen

A screenshot of the "View Clinics" screen. It features a white background with a blue header. The screen displays a list of clinics, with "Osteos Clinic" highlighted. The clinic details include "Mahantesh Magadum" and "Bilgen". There are "View Details" and "Book Appointment" buttons.
