E -Pharma Companion

- Many prosthetics, orthotics, rehabilitation aids and specialized medical equipment's and devices are not standard prescriptions
- The pharmacies, hospitals, sports clubs and fitness centers generally don't keep the stock of these specialized equipment's and aids
- The patients in need of such specialized prescriptions either have to wait for pharmacies to get them delivered by their vendors or contact the specific vendor carrying the specialized prescriptions
- OsteosConnect E-Pharma Companion mobile and web apps address this specific problem space and provide B2B and B2C solutions
